Infocom 2014 Workshop on

Communication and Networking Techniques for Contemporary Video

The Workshop on Communication and Networking Techniques for Contemporary Video will take place during Infocom 2014 in Toronto, Canada, from April 27th to May 2nd 2014. The aim of the workshop is to bring together researchers working on communications and networking techniques for **delay-sensitive applications**, such as streaming video. Previously unpublished works in the following areas are of interest:

- Video over Wireless
- Sequential Source and Channel Coding Techniques
- Application Layer FEC (Raptor Codes, Streaming Codes etc)
- Delay-Aware Network Coding
- Distributed Storage and Caching
- HTTP Adaptive Streaming
- P2P streaming and live streaming
- Cross-Layer Rate-Delay Tradeoffs
- Delay-Optimized Routing
- Multicast for Video Delivery
- Scheduling Techniques for Video
- Network Utility Maximization
- Experimental Results in Multimedia Streaming

Submitted papers should be of sufficient length and detail for review by experts in the field. Papers should be submitted for review through EDAS. Papers should be no longer than **six** pages in 10 pt. font and should not be under review at any other conference or journal.

Key dates

Paper submission deadline	~~Dec. 15, 2013~~ Dec 23rd
Acceptance notification	Feb 7, 2014
Camera-ready version due	Feb 28, 2014
Workshop date	TBD
